DAFFODIL INTERNATIONAL UNIVERSITY

Proposal on C programming project

Course Code: CSE-135

Proposed To

MD.NAZMUL HOQ SALIM

Proposed By

TEAM – MOORICH

Team Members

MD. Abdur Rouf Nirob [162 – 15 - 741]

Tarikul Islam [162 – 15 - 746]

Md. Yeashin Rahman [162 - 15 – 750]

PASSIONATE

Nirob: To be a good programmer.

Tarikul Islam : To be a App developer

Yeashin : Data Science , Programming ,Graphics

"EMPLOYEE OR STUDENT INFORMATION MANAGEMENT SYSTEM"

Description: We are calling that project "MANAGER". By using that system one can store all information about a student or employee. It also can find you the data very easily. Using menu command all data can be visible, delete, insert , update. For the students their information like ID, Name, Age, Batch, Section, Department these type of data can be stored organized way. For employee their information like their salary, Name, Age etc also can be stored, update , delete. The system will be very light. Because there wouldn't be graphical elements & a structured data management system will be used. Searching will be much faster because of using best searching algorithms. This is how the system will work.
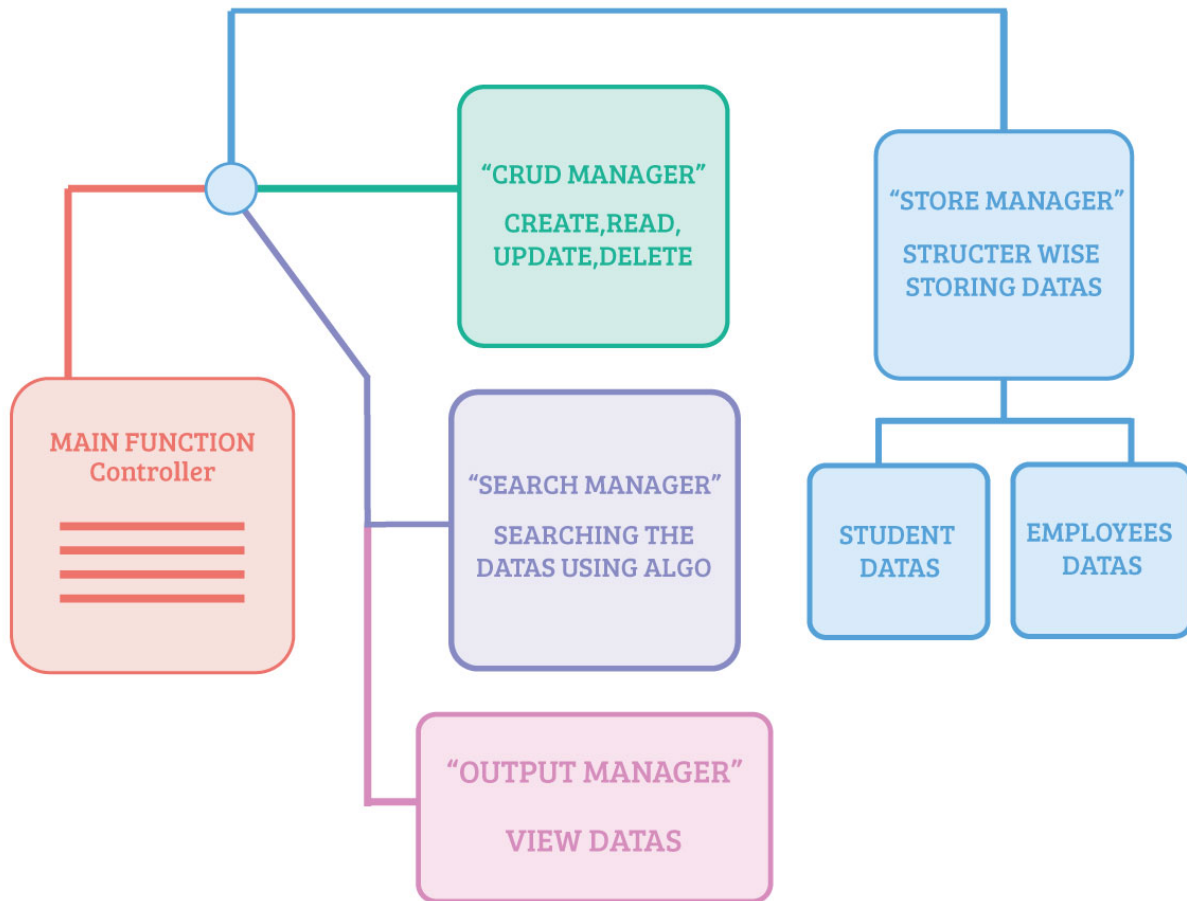

TOOLS:
(I) CODEBLCOKS COMPILER

LANGUAGE:
C/C++

DATABASE/STORAGE:
Data Structure Containers. (Stack, Queue, Vectors)

BASIC WORDKFLOW DIAGRAM FOR PROJECT "MANAGER"

CONCLUSION: This project can be used in a Company / Educational Institute for managing information about the students or employees.
